PROFESSIONAL SUMMARY

Detail-driven frontend developer with 1+ years building fast, accessible web apps with HTML, CSS, JavaScript, Bootstrap, Tailwind, and React. Known for clean UI, reusable components, and clear, friendly collaboration with designers and engineers. Currently expanding skills in user research, product discovery, and roadmap planning as an aspiring product manager.

WORK EXPERIENCE

Frontend Web Developer

African Girls In Tech Academy, Remote.

- Collaborated on SafeCity, a web app that enables users to report and track poor infrastructure in their city.
- Built responsive user interfaces using HTML, CSS, React and JavaScript to ensure a smooth user experience across devices.
- Collaborated cross-functionally with 5+ teams (Backend, DevOps, QA, Project Managers) to successfully build a Task management platform that helps users track projects or tasks across team.
- Integrated form elements and validation for submitting reports, tracking report and data accuracy.
- Maintained an organized and efficient work environment by ensuring tasks were completed accurately and on time.
- Worked closely with the team to connect frontend components to backend endpoints for real-time report tracking.
- Gained hands-on experience in version control (Git), project collaboration, and frontend problem-solving.

Affiliate Marketer

Remote.

- Promoted digital products across various social media platforms, tailoring content to each audience.
 - Created engaging posts and persuasive copy to highlight product benefits and drive interest.
 - Utilized basic marketing strategies to attract potential buyers and increase product visibility.
 - Worked closely with the team to connect frontend components to backend endpoints for real-time report tracking.
 - Successfully converted followers into customers through direct engagement and clear call-to-actions.
-
